

ANION EMITTER

ACHIEVE OPTIMUM HEALTH AND BALANCE

The Juuva Anion Emitter contains rare earth minerals and semi-precious crystals (like Watermelon Tourmaline and Zeolite) in a stainless steel barrel that helps activate the piezoelectric aspect of the crystals so that they emit a certified 2,000 anions (also known as negative ions) per linear inch. These anions bring the body into balance and energetic homeostasis (stability). It has been discovered that cells in the body vibrate at various frequencies depending on their state of health. The Anion Emitter provides an environment that helps balance these frequencies in a way that optimizes each of the body's organs and systems.*

What are Ions?

Ions are molecules that have gained or lost an electrical charge. They are created in nature as molecules break apart due to sunlight, radiation, and moving air and water.

What are Anions?

Anions are atoms that have gained an electron, they have a negative ionic charge. These negative charges are positive for your well-being and help bring the body into balance.*

How does the Anion Emitter work?

When a person circles the Anion Emitter over an area, their body begins to resonate with the anions (negative ions) that are contained in the Emitter through a process called *biophotonic entrainment*. Similar to a tuning fork that picks up the frequencies (sound) of another tuning fork in its vicinity; anions tune these frequencies so that they are in harmony with health. When the organs and systems of the body are properly attuned, the body returns to a balanced state. A balanced body is more able to protect and heal itself.*

Anions also help you feel refreshed and energized because each cell in your body is powered by a rechargeable battery called Adenosine Triphosphate (ATP). As an electron is released and ATP becomes Adenosine Diphosphate (ADP), energy is released within the cell and your body uses that energy to act and react. Your body pulls needed electrons from anions to convert ADP back into ATP almost instantaneously. This is why when using the Anion Emitter you experience immediate increased strength and balance because all of your circuits are literally plugged in and switched on!*

Benefits of the Anion Emitter

- ***Emits at least 10,000 Negative Ions.****
- ***Boosts alertness and elevates concentration.****
- ***Helps the body manage discomfort.****
- ***Balances your body's energy field.****
- ***Enhances the immune system.****
- ***Promotes better digestion.****
- ***Combats free radicals.****
- ***Lasts a lifetime.***

Average anion count per cubic meter of air:

Air Quality	Anions
Juuva Anion Emitter	10,000+
Clear Mountain Air	2,000
Normal Sea-Level Air	1,500
Before a Storm	750
After a Storm	2,500
Typical Modern Office	150
Enclosed Motor Vehicle	50

How to Use

- Circle the Anion Emitter over an area of the body to bring that area into balance. The Emitter does not need to touch the skin but should be close. Circle as long as desired. The longer the application, the better the benefit. Or you can wear the Emitter whenever needed. Purchase the Anion Emitter Guide for more detailed information.
- Circle the Anion Emitter over food and drinks for approximately 30 seconds to energize and infuse with anions (caution: food and drinks may change flavor when exposed to anions).

Negative ions have documented health benefits. Over 17,000 ion-related studies are available online at PubMed and the online US National Library of Medicine website, maintained by the National Institutes of Health.

For Mental Function & Concentration

“Negative ions increase the flow of oxygen to the brain; resulting in higher alertness, decreased drowsiness, and more mental energy,” says Pierce J. Howard, PhD, Director of research at the Center for Applied Cognitive Sciences in Charlotte, N.C. <http://ow.ly/BKRwO>
